

Kautex Maschinenbau concludes Open House event

Post date : 29/09/2008

More than 250 international customers attended the Open House event on September 18 at Kautex Maschinenbau in Bonn, Germany, to get updated information on new equipment and procedures that help boost efficiency in extrusion blow molding.

The event included a display of Kautex equipment, as well as numerous presentations surrounding this year's prime theme of "efficient production". Presenters included experts from Kautex and renowned representatives from other companies such as EMS-Chemie AG, LyondellBasell, Du Pont de Nemours, or Miliken Chemicals.

Moreover, the guests from Europe, Asia and South America watched a total of 22 machines in production operation in the Kautex manufacturing halls. A particular attraction was the new Kautex Technikum, where Kautex development engineers were available for questions and demonstrated the latest innovations in equipment and processes.
