

A history marked by innovative strength and service for our customers have made Kautex Maschinenbau the world's leading company in extrusion blow molding – because plastics and sustainable innovations are our passion. At Kautex Maschinenbau, we realize intelligent production solutions for value-added articles. But we want more: our vision is to be a pioneer of change and value creation together with our customers and partners. **Be One – with customers and partners.**

We are looking for a

Project Manager (m/f/d)

Your responsibilities

- Leads projects for the business cases for acquisition, sales order, retrofit and development
- Planning, defining and tracking the activities, milestones and deadlines of the project. For this purpose, the provided project management tools and methods are used and acted accordingly in the project team. The results are documented in the company's project planning environment
- Assumption of complete responsibility for full clarification in the event of changes to the scope of supply and services. Internal supplements are the responsibility of the Project Manager
- Responsibility for the clarification, communication and tracking of milestones, technical aspects and

logistics as an interface to the customer (e.g. parts provided by the customer to the machine/mould or similar, logistics transport, deadlines etc.)

- Responsible for the planning and execution of the preliminary and final acceptance with the customer as well as the elimination of residual defects
- Responsibility for the timely receipt of project-related client payments
- Responsibility for project closure, which includes handing over the project to After Sales, recording „lessons learned“ from project execution and deriving conclusion from these in improvements for future orders

Our requirements

- Technical degree or technical training appropriate to the tasks
- Proven experience in project management, ideally in the mechanical/plant engineering industry
- Excellent internal and external communication skills
- Structured and independent way of working
- Strong customer orientation and ability to work in a team

We offer you

- the opportunity for modern and innovative thinking - be part of the answer and develop solutions for one of the most important raw materials on earth - plastic
- a diverse work environment - where we meet people of all nationalities on a daily basis and are collegial in our dealings with them
- the chance to breathe and live innovation with all your colleagues - bring your revolutionary ideas to life with us, focused on our customers and partners
- modern structures - through an adaptable and changing workplace in a leading international company in the blow moulding industry
- time for all the important things in life - through flexible working hours and hybrid working
- room for self-realisation - through the requirement for independent, autonomous work in a motivated team with short decision-making processes
- personal and professional prospects - by offering sustainable additional benefits such as a company pension scheme, company fitness, bike leasing, etc.
- self-determination over your future - as we promote individual advancement of potential and expertise through continuous and flexible further

development in and with the organisation

Compact

- Field of activity: Project management
- Employment relationship: Full-time
- Good income and social benefits according to the collective agreement for the chemical industry

We look forward to meeting you!

Are you interested in this task? We look forward to receiving your application!
