World premiere at K2025 – Kautex launches the new KEB GREEN Series

Bonn, September 2025 – Celebrating its 90th anniversary, Kautex Maschinenbau presents its broad machine portfolio at K 2025 – from proven platforms to future-ready solutions. The highlight: the **KEB20 GREEN**, a fully electric, compact, and energy-efficient blow molding machine, shown in live operation at the booth – a world premiere!

“At Kautex, we don’t start with the machine – we start with our customers’ product. From there, we build systems that are modular, smart, and proven in the field. That’s our promise: **Engineered Around You**,” says **Guido Langenkamp, Product Portfolio Manager at Kautex Maschinenbau**.

The KEB20 GREEN embodies this philosophy:

- **All-electric and resource-saving** – significantly reduced energy consumption
- **Compact design** – quick mold changes and modular setup
- **Digital upgrades** – including DataCap and Ewon Box for process optimization and remote support
- **Integrated automation** – from cooling to quality control

Beyond the KEB20 GREEN, Kautex is showcasing the breadth of its portfolio – from the compact **KEB series** and high-speed **KBB machines** to large-scale systems for industrial packaging and composite applications.

“With the KEB20 GREEN, we demonstrate how 90 years of experience connect with cutting-edge technology. Our customers can count on us to preserve what works – while boldly building what’s next,” emphasizes **Eike Wedell, CEO of Kautex Maschinenbau**.

Customer benefits at a glance:

- Modular, flexible platforms for diverse applications
- Integration of leading partner components (e.g., Feuerherm PWDS, W. Müller tooling)
- All-electric technologies for efficiency and sustainability

With Jwell Machinery Group as its new owner, Kautex also gains access to an even wider technology and component base. “We are still Kautex – just stronger. With Jwell as our partner, we can develop faster, act globally, and stay close to our customers at the same time,” adds **Haichao He, President of Jwell**.

Live at K 2025 (Hall 14, Booth A16/A18):

- KEB20 GREEN in real production with W.Müller die head S2/160-260 P-PE ReCo and SFDR® unit by Feuerherm as a partner showcase
- K-ePWDS®/SFDR® system by Feuerherm
- Digital product and machine experience

About Kautex Maschinenbau

Shaping and forming the industry for 90 years, Kautex has been a global leader in extrusion blow molding. With headquarters in Bonn and a dense global network, Kautex delivers German-engineered solutions backed by deep process know-how — helping customers worldwide achieve the highest levels of product quality, efficiency, and sustainability.
