KAUTEX MASCHINENBAU

KAUTEX RETROFIT

Modernization for Maximum Efficiency.

From Today to Tomorrow: Transformation with Kautex

Getting Future-ready – with Kautex Retrofit and Modernization.

Standing still is not an option – especially in manufacturing. With our retrofit program, you can modernize your existing extrusion blow molding systems in a targeted and cost-effective way. This includes both current and older Kautex machines, as well as third-party equipment. We upgrade control systems, heads and extruders, automate processes, and integrate new technologies directly into your existing setup. The result: extended machine lifetimes, improved efficiency, and maximum production flexibility. Choose Kautex Retrofit – for efficient, sustainable, and forward-thinking production.

STAY COMPETITIVE AND FUTURE-READY
With smart technical upgrades, automation tools, and process integration, we help you adapt quickly to new demands, reduce scrap, and secure long-term competitiveness.

LOWER COSTS AND OPERATE MORE SUSTAINABLY
With RWDS/PWDS technology saving up to 10% material, shorter cycle times, and reduced energy use, you cut costs every day while increasing process stability and quality.

EXTEND THE LIFETIME OF YOUR MACHINES
Retrofit extends the lifecycle of Kautex equipment — and even third-party systems. From control upgrades to component replacements, we make older machines perform like new.

IMPROVE USABILITY AND COMPLIANCE
Modern controls and visualizations make operation easier and safer. At the same time, CE compliance checks ensure your equipment meets today's safety and legal standards — even for legacy machines.

Lifecycle Prolonging – Use it longer. Smarter.
Why replace when you can upgrade?
With Kautex Lifecycle Extension, you extend the lifetime of your extrusion blow molding machines — economically, sustainably, and future-ready. We replace outdated parts, modernize control systems, and ensure CE compliance, while your existing infrastructure stays in place. The result: more reliability, efficiency, and ease of use — without investing in new equipment.

Efficiency Increasing – When Parameters changes Your Machine follows.
Optimization that Pays Off. Get more out of your existing Kautex system with targeted retrofit upgrades. From new extruders and advanced controls to process optimization — we boost productivity, quality, and energy efficiency without replacing your machine. The result: higher output, less waste, and sustainable performance for the long term.

Machine Adaption – When Your Product changes Your Machine follows.
Adapt to New Demands. Markets change — and with Kautex machine adaptation, your equipment keeps up. We retrofit your system for new products, molds, or materials, or relocate it entirely — precisely, efficiently, and fully integrated. The result: maximum flexibility and future-ready production without the cost of new equipment.

Ready to upgrade your production?
Our experts will help you find the right retrofit solution — tailored to your machines and your goals.
